

Blockchain development company that turns ideas into reliable solutions.

Who we are

NodeFactory is a company cofounded by proficient developers that realized what Web3 means for the future of the apps and decided to focus on it. We are committed to developing new technologies and leveraging them to make better applications worldwide.

Because of our various experience in different technologies, we can help you:

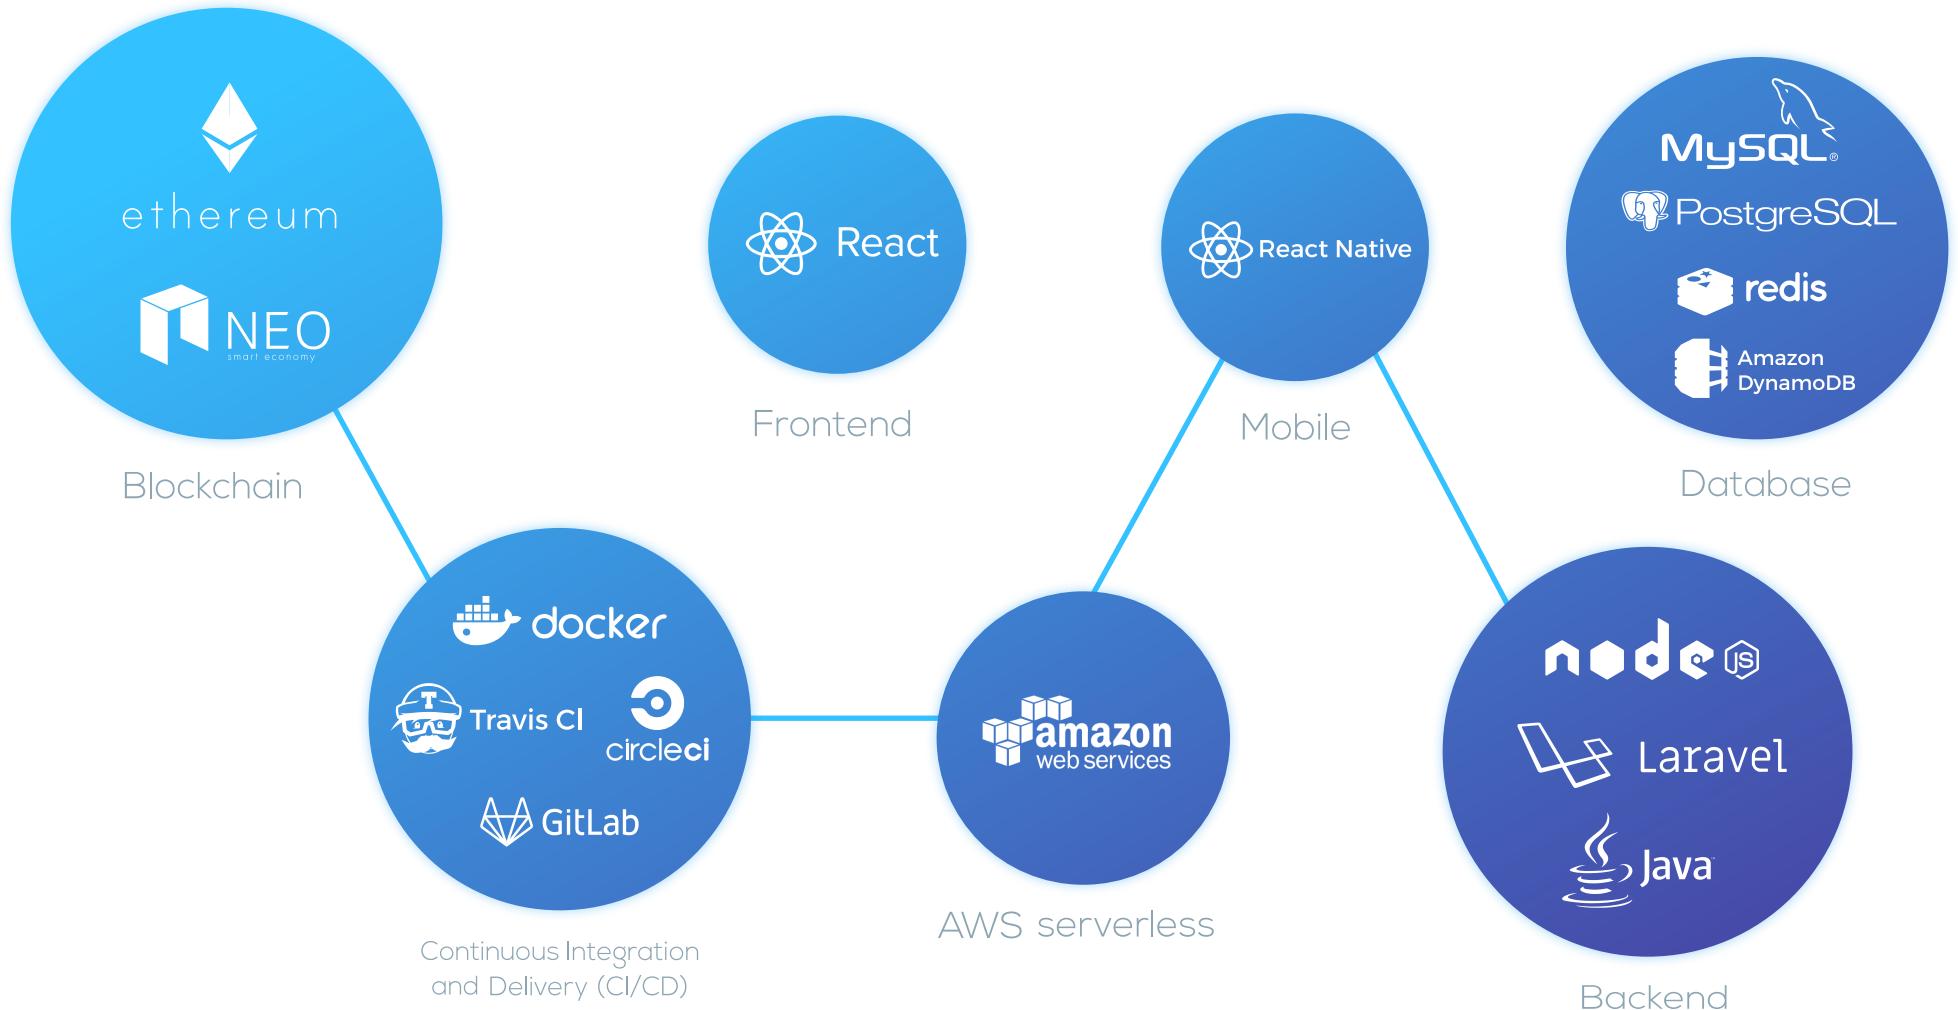

- develop a complete web or mobile solution backed by any decentralized network like Ethereum, EOS, NEO, Stellar or anything else that makes sense!
- adopt blockchain into existing systems
- blockchain consulting
- audit smart contracts
- develop infrastructure for ICO or STO

Members of Association for blockchain and cryptocurrency (UBIK).

Technology

We are experienced in the following technologies

... and we are always curious to try something else.

We love open source. Check our Github for our contributions!

NOVO protocol

About:

A blockchain-based marketplace for commercial data that enables companies to request data on others anywhere in the world.

Work done:

- Bounty system where data requesting, contribution and verifying is completely based on Ethereum smart contracts.
- Data encryption.
- Decentralized storage IPFS.
- MetaMask authentication.

PREVIEW

Allianceblock

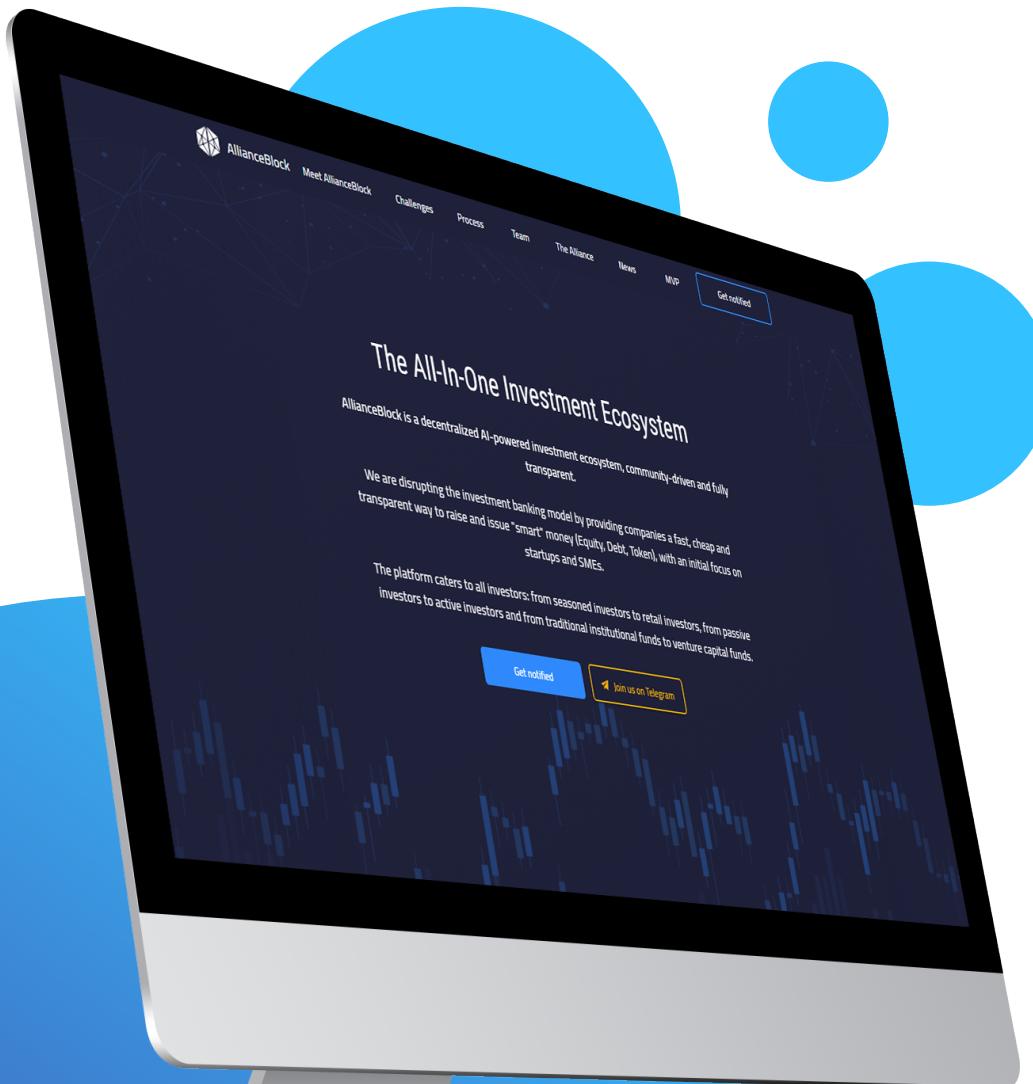

About:

Decentralized AI-powered investment and financing platform, community-driven and fully transparent.

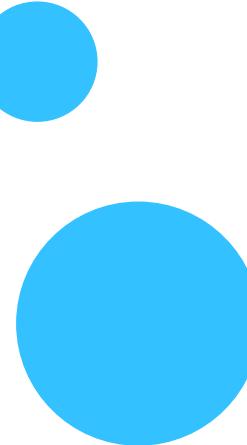

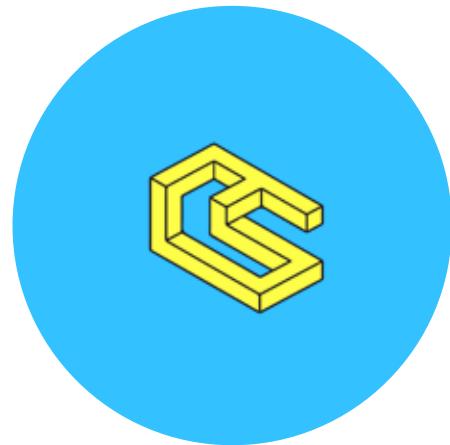

Work done:

- Smart contracts generation and deployment.
- Multi-blockchain client wallet.
- Scaling of backend transaction relaying.

PREVIEW

Ethereum 2.0 client

About:

Collaboration with ChainSafe on infrastructure development of Eth 2.0.

Lodestar client is a TypeScript implementation of the Beacon Chain.

RioBot

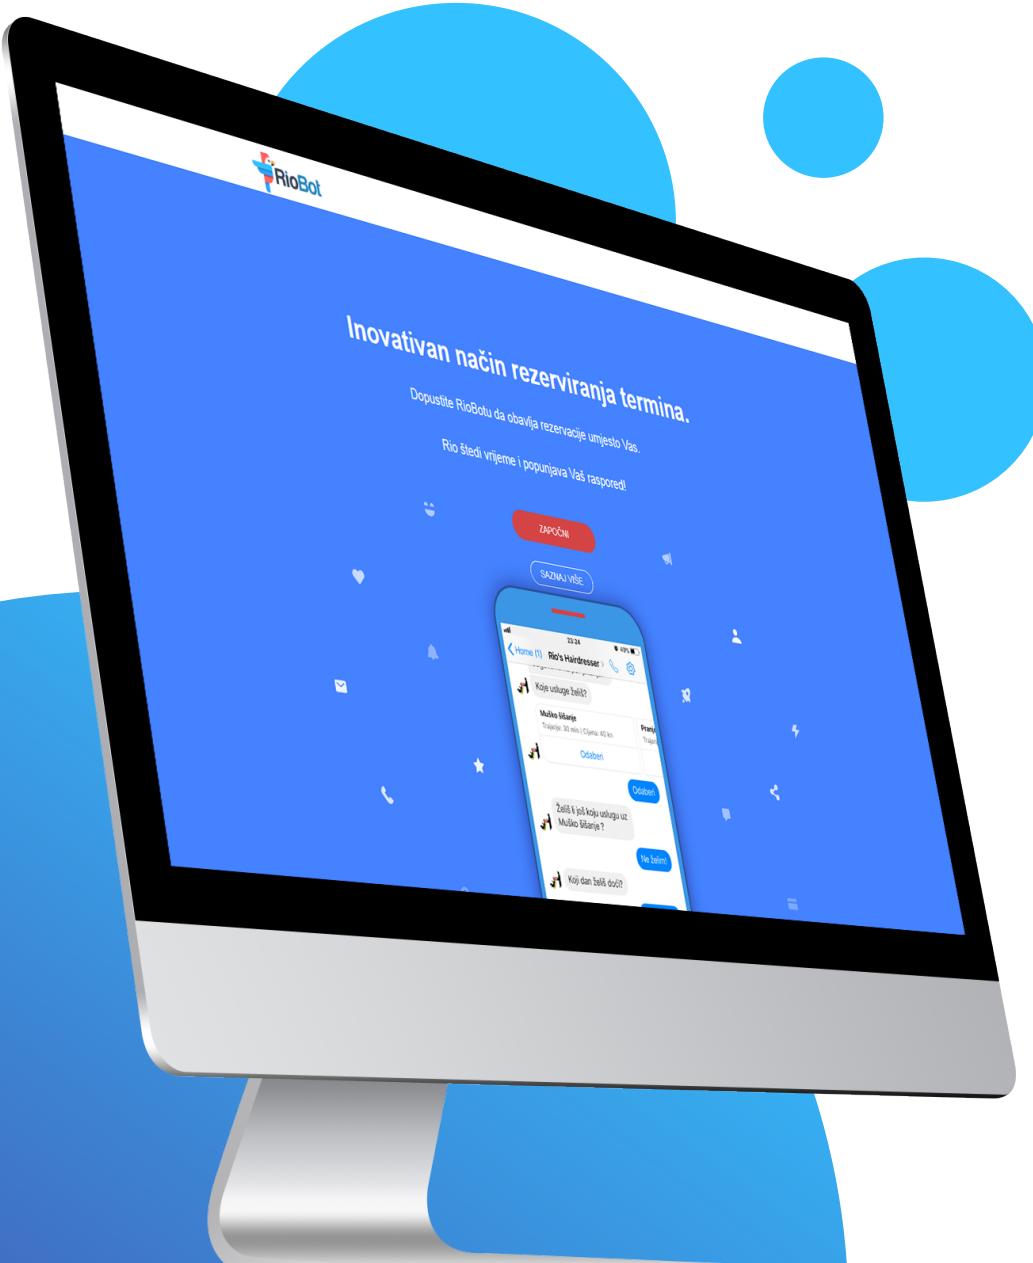

About:

Chatbot platform for online appointments over Facebook Messenger.

Work done:

- Automatic deployment of chatbot to any Facebook page.
- Natural language processing.
- Admin panel with Google calendar integration.

PREVIEW

EatMyBet

About:

Player vs. Player betting application for football WorldCup 2018.

Work done:

- Smart contracts.
- Game results scraper.
- Oracle to access the results from blockchain.

PREVIEW

Testimonials

Matthijs de Vries

Co-Founder, AllianceBlock

"They have a variety of skills and possess insights regarding a wide array of subjects."

Smart Contract Development
for Investment Platform

John Potter

Project Manager, Novo

"NodeFactory felt like a natural part of the team from the beginning."

Development of
Blockchain Marketplace
